

# iFaux 5

**IMPORTANT:** Ask an adult to help you when cutting out the template

## Things you'll need.

- 1 sheet of A4 paper
- A printer
- Scissors
- Stickytape/glue stick

## Instructions

### Step 1

Carefully cut out your iFaux template

### Step 2

Stick it together using the grey tabs and your applicant of choice.

### Step 3

We favour celloctape for it's clean lines and glossy effect which adds to the aesthetics of your new iFaux 5.

Here's one we made earlier.

Your completed iFaux should look exactly like your iPhone 4 but longer. Kind of like you've given it a penis enlargement.

### Finished?

Once it's finished proudly parade your iFaux 5 infront of your friends. Be sure to tweet photos of your new #ifaux.
